RE: Jacob and Samuel Drilling Ltd.

To Whom it May Concern,

This letter is to confirm that Jacob and Samuel Drilling Ltd. are currently contract diamond drillers for Wallbridge Mining Company Limited and have been diamond drilling for Wallbridge since 2012 with one or two drill rigs following an annual competitive bid process.

Since 2012, Jacob and Samuel have completed approximately 70,000 metres of drilling for Wallbridge. This has included drilling from 50 metres to greater than 2000 metres depth with wedging and NAVI directional drilling. Work has also included helicopter supported programs, drilling near waterbodies, construction of drill trails, drill pads and ice roads/bridges. Most of the drilling has required coordination with other contractors for borehole surveys including gyro and borehole EM geophysics.

Wallbridge has had a positive experience working with Jacob and Samuel. They have demonstrated good productivity, skill with core recovery and getting the drill hole to the target under difficult ground conditions, transparency and communication skills, a strong focus on health and safety, environmental performance, and sensitivity to local community requirements.

Wallbridge has had no significant incidents reported by Jacob and Samuel during the programs since 2012, including no lost time or medical aid incidents reported by the contractor.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Josh Bailey', is written over a light blue circular stamp.

Joshua Bailey, P.Geo., M.Sc., MBA
Vice President, Exploration
